

Amendments to the Claims

The listing of claims will replace all prior versions, and listings of claims in the application.

1. (currently amended) A method of making an oxidation protective multiple coating for a carbon/carbon composite, the method comprising:

(a) forming an initial coating layer on the carbon/carbon composite by a pack cementation process;

(b) spraying a mixture comprising ~~[[of]]~~ a vehicle liquid and Si powder on the carbon/carbon composite; ~~[[and]]~~

(c) heat-treating at a temperature of 1400 °C to about 1600 °C under a pressure of about 10 mTorr to about 1000 mTorr the Si-coated carbon/carbon composite to impregnate the initial coating layer and cracks in the initial coating layer with Si; thereby forming an SiC layer and an Si layer; and

(d) oxidizing the Si layer to form an SiO₂ film.

2-3. (cancelled)

4. (currently amended) The method of claim 3~~1~~, wherein the vehicle liquid is a volatile alcohol.

5. (cancelled)

6. (previously amended) The method of claim 1, wherein the oxidizing of the Si layer is performed at a temperature of about 400 °C to about 800 °C.

7. (withdrawn) A coated carbon/carbon composite made according to the method of claim 1.

8. (canceled)
